27 human genes were renamed because spreadsheets kept turning them into dates.

Never lose work again.

Safety nets are switched on by default.

30 s

AutoRecover

Every changed workbook is snapshotted — even ones you never saved. Excel's default is every 10 minutes.

7 days

"Don't Save" is undoable

Closed without saving? The last state is kept for a week, one click away.

20

versions per file

Every save keeps the previous copy. Open any older version in one click.

0

half-written files

Saves are flushed to disk, then swapped in. A crash or power cut can't corrupt your file.

Everything you use Excel for.
